PROFESSIONAL SUMMARY

Software Engineer with commercial experience developing full-stack applications using React, ASP.NET Core, C#, JavaScript, SQL, and modern web technologies. Experienced in Agile development, debugging, code reviews, CI/CD workflows, REST APIs, and AI-assisted software development. Strong foundation in frontend and backend engineering, with a demonstrated ability to rapidly learn new technologies and apply them to practical software solutions. Seeking to contribute to high-performing engineering teams by building scalable, reliable solutions.

WORK EXPERIENCE

Software Engineering Intern

8/2025 – Current

Jung Talents, NSW

- Designed, developed, and maintained backend services and frontend features using ASP.NET Core, C#, and React across multiple product iterations.
- Performed code reviews, debugging, defect resolution, and refactoring to improve code quality, maintainability, and application reliability.
- Collaborated with engineers and stakeholders to clarify requirements, estimate development effort, and deliver production-ready features within Agile sprints.
- Gained practical experience aligning technical implementation with business objectives.

Academic Lab Tutor

3/2026 – Current

University of Wollongong, NSW

- Guided students in understanding programming concepts, software development practices, and debugging techniques during laboratory sessions.
- Assisted students in analysing programming problems and developing structured solutions.
- Communicated technical concepts clearly while supporting practical learning and problem solving.

Interior Designer

11/2019 – 03/2024

TTT Architects (Vietnam) | Adrien Desport Architects (Vietnam)

- Delivered 60+ architectural and interior design projects, leading 15+ projects or major workstreams while balancing technical requirements, design quality, budgets, and deadlines.
- Experienced in many tender submissions due to strong reliability, accountability, and ability to perform under pressure.
- Coordinated with engineers, contractors, and stakeholders to deliver high-quality outcomes.

SELECTED PROJECTS *(More details available via portfolio link)*

Nhan Van Education Ielts Platform (Commercial Project)

10/2025 – Current

- Developed and integrated backend services using ASP.NET Core to implement platform functionality and support feature delivery.
- Built responsive user interfaces using React and Tailwind CSS.
- Integrated REST APIs and contributed to CI/CD deployment workflows.
- Collaborated within an Agile team using Git-based version control, pull requests, and code reviews.
- Contributed to end-to-end integration across frontend, backend, and deployment environments.

Richard Le StoryBlok Migration (Commercial Project)

12/2025 – 02/2026

- Refactored frontend architecture to support CMS-driven components while maintaining performance, responsiveness, and clean code structure.
- Independently learned Storyblok CMS and applied it within an active commercial project to deliver the migration within project constraints.

E-Government Microservice Platform (University Project)

09/2025 – 11/2025

- Designed and implemented a microservice-based application in a six-member Agile team using ASP.NET Core.
- Implemented backend services communicating through an API Gateway.
- Containerised services using Docker and validated system integration locally.
- Collaborated through Git workflows, pull requests, and code reviews to support integration.

Recording Studio Booking and Management System (University Project)

04/2026 – 05/2026

- Developed a dynamic web application using Object-Oriented PHP, MySQL, HTML, and CSS.
- Implemented CRUD functionality, authentication using PHP sessions, and backend business logic.
- Applied relational database design and server-side programming concepts to support booking workflows.

Shakespeare-Specific AI Chatbot (University Project)

04/2025 – 06/2025

- Designed and implemented a domain-specific AI chatbot using a RAG architecture.
- Processed raw play scripts into structured datasets to support efficient semantic retrieval.
- Integrated retrieval with a generative model to improve answer relevance and contextual accuracy.
- Built an end-to-end pipeline including data preprocessing, vector retrieval, and response generation.

EDUCATION

Master of Computer Science

07/2024 – 07/2026

University of Wollongong, NSW

- WAM: 90/100
- Strong grounding in software engineering, data systems, and applied machine learning.

Bachelor of Interior Design

09/2014 – 11/2019

University of Architecture Ho Chi Minh City, Vietnam

- Valedictorian of Interior Design Course 2019 (HD: 3.45/4).

TECHNICAL SKILLS AND TOOLS

- **Programming:** C#, Python, JavaScript, PHP, SQL.
- **Frontend:** React, JavaScript, HTML, CSS, Tailwind CSS
- **Backend:** ASP.NET Core, REST APIs, Microservices
- **Development:** Git, CI/CD, AWS, Docker, Agile/Scrum
- **AI-assisted development:** ChatGPT / AI-assisted development tools
- **Databases:** SQL, MySQL, PostgreSQL

EXTRA-CURRICULAR ACTIVITIES

IEEE Xtreme 24hour programming competition

26/10/2024 – 27/10/2024

Pulse Volunteer - University of Wollongong

08/2024 – 11/2025

Course Team Leader - TCS Sydney Marathon

09/2024

REFEREES

Available upon request
